

Ottawa, Week by Week

(By M. L. SCHWARTZ)

Only Speculation

It is a relative certainty, apparently in this capital, that the federal government would move to join a North Atlantic security pact, but there is nothing in this capital to suggest, as many seem to believe, that such may call for vast expenditures on defence as a result of such an agreement. Indeed, it is now hinted that no estimate can be made accurately about such costs or how much it may involve, so that estimates based at this time are mere speculation and no more.

Present Prospects

Since steel plays a vital role in construction, manufacturing, in this country, affecting the backbone of production, the current shortage of steel and its restricted import from the U.S., may continue for some time yet is the news heard here, with the latest official information showing that the output of steel ingots in the first ten months of 1948, ending October, totalled 2,560,000 tons compared with 2,366,582 last year in the same period. In addition, there is little immediate hope for much improvement in the Canadian steel situation, though latest production may be at a record 3,100,000 ton per level this year, it is said.

Newcomers Arriving

The arrival in this country of new Canadians in the coming year may be speeded up, it is understood in this capital, if it can be found to bring such persons, and in other conditions abroad are peaceful to warrant such movements, with the fact that in Canada since the end of the war said to have exceeded the quarter of a million mark in number, approximately half of whom came here from the United Kingdom.

Shortage is Foreseen

Unless imports are increased, there is a belief here that Canadians may be in for some severe shortages of butter during certain periods of the winter, in the face of the butter imports already contracted for by the authorities from several countries. Consumption is already exceeding production in Canada, it is reported, and there are several factors which may affect the availability of butter.

In the first place, it appears that in some parts of Canada, butter production is as high as anticipated for this time, on account of the fact that dairy activity is not being encouraged sufficiently by returns offered.

In the second place, the butter supply may be influenced by the greater return to the farmers for milk which is used for dairy products other than butter.

However, whatever may be the real cause, whether it be general prosperity causing Canadians to use more butter or falling off in domestic production, it is evident here that there is a distinct possibility of butter shortages appearing this winter even though, unless imports are increased beyond those already made known by the authorities.

Few Complaints

"Generally speaking, outside the field of rent control, we get very, very few complaints from the public," Kenneth W. Taylor, chairman, Warren Prices and Costs Board, told the House of Commons on Prices here. "I hasten to add that I do not for a moment suggest that it is because the public is not concerned about particular prices or the general level of prices. I think it might be fair to suggest that the public, generally speaking, is not aware of what things remain under control. They are confused."

No More Servants

John and Walter, Minister Paul Martin stressed at a meeting here of physicians and surgeons, that the Canadian government would take no action under its health program which would "etify or destroy the liberty of the individual doctor."

Women's Missionary Society

The December meeting was held on Thursday the 5th in the Church annex, the president, Mrs. Peter Thompson, presiding. The opening hymn was 384. The devotional was taken by P. Thompson, reading Luke 2, 7-14 and offering prayer.

The minutes of the November meeting were read and approved as read.

The treasurer's report showed that we are somewhat short of our objective for the year, which was set at \$10,000, and a 20 per cent increase. The reason for the increase is the many open doors to Gospel at the present time, and therefore the call for more men and women in the missionary field. The president felt that the books should be left open for a week or two longer to allow more funds to come in if possible.

After singing hymn 53, the reports of the secretaries were received. Those secretaries who were present, Mrs. L. H. Campbell, Mrs. W. D. Fitzsimmons, C. Greer, and Wm. Gibson.

Interment was made in Delia, Saskatchewan.

Winter's Funeral Home, Drumheller, had charge of arrangements.

Rev. E. David

Rev. E. David was called to the chair to preside.

After the service, being for president, Mrs. P. Thompson was nominated and after much persuasion, declined to carry on.

Mrs. L. H. Campbell moved and Mrs. Fitzsimmons seconded, that the officers of the present year all carry on for the coming year.

This was carried with but one dissenting.

Rev. David addressed the assembly, pointing out the tremendous responsibilities of the work to the women and to the children because we are so blessed with abundance. He also conducted the impressive dedicatory service, which was responded to by the choir.

The dedication hymn was No. 363 and the meeting closed by prayer and the benediction by Rev. David.

Said in the Capital

"Canadians have a particular interest in this problem, because of the natural resources which lie in our northwest country," said Transport Minister Chevrier here, adding that security cannot be compromised until adequate safeguards for the control of atomic energy have been accepted by all nations of the world.

"The C. C. F. party is not Marxist at all," emphasized the party leader, M. J. Coldwell, in this capital.

"You could have had television in your house by today, you could have had it yesterday, but you are taking your time," commented Norman Collins, head of television for the British Broadcasting Corporation, on Canada's delay in this new kind of broadcasting.

"There have been suggestions in the press that compulsory military training might be adopted in Canada," remarked DeLoe Minister Claxton here. "but peacetime conscription is not being considered."

In scientific matters the North American continent had caught up with and perhaps passed Europe, but the humanities and fine arts were still far ahead in Europe," declared Canadian astronomer, Dr. C. S. Besla, at a gathering here.

This is a friendly and kindly country, where you may go to any church you wish," said Labor Minister Humphrey Mitchell to a group of new Canadians, who gathered here to receive their diplomas in basic English and citizenship.

Obituary

Florence Bradford

We regret to report the death of Mr. John J. Bradford, who passed away in Delia on Sunday, December 5th, aged 64 years.

He was born in Walkerton, Ont., and came to Alberta with his parents from the Dakotas in 1902. After his marriage, he came to Delia in 1914, and resided here for many years before moving to Lethbridge with his husband. She is survived by her husband, one son, Russell, of Lethbridge; and two sisters, one at Lethbridge and one at Spokane, Wash., U.S.A.

Funeral services were held in Delia United Church on Wednesday, December 8th, Rev. David officiating. Mrs. Bradford presided at the piano. Hymns sung were "Lead Kindly Light," and "Ade With Me." Mr. Austin Whitman sang solo, "The Old Rugged Cross."

Palbearers were—J. Wilson, Thompson, D. H. Campbell, W. D. Fitzsimmons, C. Greer, and Wm. Gibson.

Interment was made in Delia, Saskatchewan.

Winter's Funeral Home, Drumheller, had charge of arrangements.

Sunbeam News

Mr. and Mrs. Russell Fraser and son Glen, were visitors near Bytown on Wednesday at the home of Mr. and Mrs. Allan Reeves.

Miss Grace Herman, R.N., from Calgary, arrived on Tuesday morning's bus to visit with her parents, Mr. and Mrs. E. M. Herman.

We regret to report the death of Wm. Adams, an old-timer of this district. Mr. Adams passed away on Tuesday in the hospital at Ponoka. The sympathy of the community is extended to Mrs. Adams and relatives.

Mr. and Mrs. Ivan Anderson and family, were guests at the home of Mr. and Mrs. Stan. Cusack on Sunday afternoon.

A miscellaneous shower was held at the home of Mrs. Henry Birkheim on Wednesday afternoon in honor of Miss Grace Herman, a bride-elect of this month.

Mrs. Charles Chambers returned from the Drumheller hospital the forepart of the week, and is now convalescing at home.

Thos. Ridley is a patient in the Holy Cross hospital in Calgary, where he underwent an operation last week.

Calgary visitors last week include Mr. and Mrs. Thos. Ridley, Mr. and Mrs. Art Nelson, Mr. and Mrs. Fred Holland, Mr. and Mrs. Harold Nelson, Jimmie Smith, Miss Margaret Nelson, Miss Pontifex, and Miss Margaret Holland.

Mrs. Ed. Desrope, and daughter Marian, returned home on Wednesday evening, having spent the past couple of months in Los Angeles, Victoria, Vancouver, and Calgary.

Mr. and Mrs. Ernie Coenen and family, were guests on Sunday at the home of Mr. and Mrs. Stanley Coenen.

December meeting of the Sunbeam Women's Missionary Society was held last Thursday afternoon at the home of Mrs. Andrew Nelson, with only about fifty per cent of the members present, owing to the severe cold weather.

This is a friendly and kindly country, where you may go to any church you wish," said Labor Minister Humphrey Mitchell to a group of new Canadians, who gathered here to receive their diplomas in basic English and citizenship.

More Indians live in B. C. than in any other province.

Beware of Ergot

Lethbridge Experimental Station

Weekly letter.

Fedals infected with ergot when fed to livestock, even in small amounts, may have very injurious effects. Ergot is a fungus growth that feeds a black, horny mass on the heads of cereal grains, or grasses. In threshed grain, ergot appears as black particles of varying sizes. Because of favorable climatic and moisture conditions during the past summer, ergot infected feeds are quite common this year.

Ergot is especially injurious to pregnant animals, often resulting in abortions or the light of weak or dead young. Continued consumption of ergot infected feeds may cause a painful gangrene to develop in the ears, tail, and perhaps feet of the animal. Horses and cattle seem to be more susceptible to the harmful effects than sheep or swine. However, small amounts of ergot infected feeds have been fed to all classes of stock without ill effects.

Where the farmer is faced with the problem of feeding a cow or pig, he may be willing to assume some little risk, rather than sell it at a discount and buy it clean. In such a case, as much of the ergot should be removed as possible by putting the grain through a flensing mill or commercial grain cleaner.

The concentration of ergot can be further reduced by mixing the ergot infected feed with clean feed. Experience has shown that grain containing more than 1 per cent ergot is dangerous to livestock. Apart from its poisonous properties, feeds affected by ergot are usually of lower feed value.

If fed infected with ergot to a cow, it will be preferable to feed it to one or two pigs instead. All animals being fed such feeds should be carefully watched for any unfavorable symptoms, and if any appear the feeding of the ergot infected feeds should be discontinued immediately.

There is at present no medicinal treatment known for the disease contracted by the ill effects of ergot.

THE WORLD OF WHEAT

By H. G. L. Strange

Director "The Crop Testing Station"

The Passing of Red Bobs

Red Bobs, that early wheat which has brought untold millions of additional dollars to prairie farmers, is passing. The Board of Grain Commissioners announces that on and after December 15, 1948, Red Bobs will not be graded higher than No. 3 Manitoba Northern, for which it has been found, now that Red Bobs has been subjected to greatly improved laboratory tests, that this variety is lower than Marquis, which is the standard—in protein content, loaf volume and elasticity of dough. Red Bobs was discovered as far back as 1910 by the great Canadian seed grower and selector, Dr. Seeger Wheeler, of Estevan, Saskatchewan—when out of a selection of White Bobs, which he imported from Australia, he found one or two plants that had a red kernel. All the Red Bobs were grown since came from one single plant sowing red kernels, which Seeger Wheeler then selected. All white, however, like everything else, have their day. Red Bobs will have lasted 41 years, which is about as long as Marquis lasted. So progress goes on. Our variety is succeeded by a superior strain, thus the tale begins; and it will go on to the benefit of our prairie farmers and to society at large.

Thatcher and Saunders are the new white wheats which is confidently expected will take the place of Red Bobs.

Grain Quotas Removed

Effective November 20, the Wheat Board removed all marketing quotas on wheat and barley at all delivery points in Alberta. The Wheat Board also said that producers in Alberta may deliver grain at any elevator at any delivery point in the province where space is available. All deliveries of wheat, oats and barley under, however, be entered in the producer's permit book in the usual manner.

CHRISTMAS Leaflet

Available now from the Home Economics Service of the Alberta Department of Agriculture, in the 1948 leaflet of Good Christmas Recipes. For fruit cakes, Christmas puddings, cookies, etc., and which are included in the usual manner.

together with a mounting time-table for the Christmas tide. In addition, the leaflet contains suggestions for table decorations and novelties for holiday entertainment.

A copy of this Christmas leaflet may be obtained free on request to the Home Economics Division, Alberta Department of Agriculture, Edmonton.

How you are assured of an ample Supply of DOMESTIC HEATING OILS and DIESEL FUELS at the New Price!

Here's two-fold good news for home-owners, farmers and ranchers in Alberta and Saskatchewan! Imperial Oil is happy to confirm that:—

1 Ample supplies of heating oils and diesel fuels are now available at new, lower prices, and Imperial Oil can guarantee your supply.

2 Your oil burner and space heater dealers also are ready to provide you with new equipment and installations.

Now, for the first time in several years, you can install oil burning cooking stoves, space heaters, hot water heaters, stock trough heaters, chicken brooders and other oil burning equipment. Today's increased production and reduced prices have been made possible by the rapid development in Alberta of Leduc and Wainwright and the promising outlook for the new Redwater field. The present and future output of these new fields assures prairie refiners of adequate domestic crude oil supplies to meet all needs.

GRIM REMINDER OF TRAGEDY—Shattered wreck of tug St. Clair is pounded to pieces by huge waves in the Pacific off Vancouver Island. Three men went to their deaths when the tug broke up before the eyes of youthful rescuers who stood helpless on shore. The crewmen who survived the disaster were taken to hospital. They luckily were hurled ashore by breakers. Wreckage was strewn over a radius of 300 yards.—S.N.S. photo.

MENNONITES RETURN TO MANITOBA—Back in Manitoba and appreciating wholesome food after their tough stay in Paraguay, Helen Hopper serves cake to her brother and sister, Henry and Billie, and a friend. The first of hundreds of Mennonite families who emigrated to Paraguay last June are returning with tales of death, disillusion, corruption and heartbreak experienced in South America.—S.N.S. photo.

AT BOTTOM OF ST. LAWRENCE 14 MONTHS MAY SAIL IN SPRING—Fourteen months after her collision with the Transalca in the St. Lawrence three miles from Montserrat, Ont., the freighter Mavoran is being refloated. This head-on view shows the big hole in her bow now raised above the 40-foot water in which she sank. The tragic collision took the lives of twelve men and twelve others had a narrow escape. Owners expect to refit the freighter and have her back in commission by next spring. It is expected to take a week to float the vessel up the river for inspection.—S.N.S. photo.

KILLED IN HUNTING MISHAP—Fatally injured when a gun accidentally discharged on a hunting trip, Lester Chynoweth, 25, of Tremont Falls, Ont., is shown here. Funeral services for the father of two young children were held under auspices of Canadian Legion.—S.N.S. photo.

DIVORCED—The young rulers of Egypt and Iran have divorced the beautiful queens who bore no male heirs to the thrones. One commission which came from Egypt's royal palace, proclaimed it "God's will" that the 10-year union of King Farouk, (above), and Queen Farida be dissolved. Another statement said the Persian climate endangered the health of Empress Farah, bride of Shah Reza. Palace of Iran and sister of Farouk, said that thus it was agreed that she be divorced. Farouk, now 24, was married in 1938 before he ascended the throne. On his 17th birthday he conferred the title of Farida, which means "partner." She bore him three daughters. Under Egyptian law, only male offspring of the king can inherit the throne.—S.N.S. photo.

ROYAL TOUR CANCELLED—KING ALL MUST REST SIX MONTHS—Announcement from Buckingham Palace, signed by five doctors, disclosed that King George is suffering from an illness that would make it hazardous for him to undertake the Royal tour to Australia and New Zealand. The trip has been indefinitely postponed. The King is suffering from an obstruction of circulation through the arteries of the right leg. The doctors' bulletin gave no cause for immediate concern. The King began to feel his illness while preparations were under way for the birth of the royal infant.—S.N.S. photo.

LAWYERS RAFFLED OVER RAFFLE PRIZE—Montreal lawyers are in a bit of a tangle over a problem that concerns Nicole Marois, (left, shown here with her father) who is looking at photo of \$20,000 "dream house" won by her father which was second prize in a child's legacy contest.—S.N.S. photo.

SOME JOKE? ... OTHERS FOUND NO CAUSE FOR SMILING—None in this queue laughed and joked as they spotted the new military uniforms. But others were smiling in the old uniforms. The new uniforms are no longer in the situation. The price rises higher as the Chinese find every advance. Fearing of the military state of currency, rice farmers are buying the crop from market. In cities near the battlefield, rice prices have been reported. The U.S. has sent battalions to coast ports to evacuate all U.S. personnel who wish to leave.

D.P.'S FREE TO DO AS THEY PLEASE—Initial immigration contract with the Canadian government fulfilled, more than 200 young D.P.'s in Ontario are free to plan their own lives for the first time since 1939. Josephine Ains and Anthony Barrella, (above), spent year working in hospital. Twenty-five of the Polish veterans have married some of them to Canadian girls. One graduate doctor from Prague has made application to practice in Canada.—S.N.S. photo.

R.C.A.F. Helping To Roll Back Our Frontiers

Helping to roll back Canada's frontiers is one of the big preoccupations of the R.C.A.F. for the aircraft of 22 photo wing reconnaissance units are being sent to length and breadth of the Dominion, such as the aircraft of the 41st Squadron, which is carrying out the mammoth task of topographical photography from the air.

These aircraft now are based in their hangars, after their greatest work in 27 years of photo operations.

One of the covering Canada by aerial photography began in 1921, when that year 300 square miles was covered. The work was gradually stepped up, as improved aerial equipment was brought into use, and last year (1947) saw R.C.A.F. aerial photo crews bring their aircraft back to Rockcliffe aerial station at the season's end.

Using big silver Lancasters, specially adapted for aerial photo work, the R.C.A.F. for the first time carried out extensive photography of Canada's Arctic lands. Two Lancasters of 41st Squadron, operating from Trondheim, in glacial country of northern Canada, and all of Labrador and the Gulf of St. Lawrence, and of the British Columbia district of northern Quebec was also done.

As an extraordinary activity, photo crews took time out to carry out the old mission of night to assist in R.C.F. work activities.

High spot of the season's operations from a spectacular point of view, when a Lancaster of 41st Squadron added more than 6,000 square miles to the map of Canada by discovery of two unexplored islands in Foxe basin, north of Hudson Bay. The larger of the two islands was determined to be between Foxe and the Hudson Bay, and Prince Edward Island. The discovery was made by flying officers, J. H. Wilson, D.F.C., of Victoria, B.C., and J. H. Wilson, D.F.C., of Victoria, B.C., who were flying over the islands, while flying over Foxe Basin.

According to his navigation, he had made a mistake in his calculations. J. H. Wilson revised his expected position at Foxe Basin, and the definite landmarks were picked up.

Jack Miner's Bird Banning Carried On By Sons

WITH the late Jack Miner being the pioneer bird bannist, his sons have taken over the task of bird bannist, one and all, and his sons are carrying on the task of bird bannist.

R.C.A.F. crews carrying out photo work in the Arctic have been many changes to the map of Canada. The work of the R.C.A.F. has been many changes to the map of Canada. The work of the R.C.A.F. has been many changes to the map of Canada.

As the photo crews are greatly increased in number, the work of the R.C.A.F. has been many changes to the map of Canada. The work of the R.C.A.F. has been many changes to the map of Canada.

Two main types of aerial pictures are taken by the R.C.A.F. The first type is the vertical type, which is taken from a high altitude, and the second type is the oblique type, which is taken from a low altitude.

Mysterious Case Of The Wrong Tonsoleilsky

AKRON, Ohio.—People's Hospital officials said they were "absolutely sure" about the mysterious case of the wrong Tonsoleilsky.

Had everything gone as it should have in the operating room, a 30-year-old woman would be recovering from a spinal operation on her lower back.

The hospital spokesman, who was reluctant to give his name as well as those of the patients involved, said that the woman was not the one who was operated on.

He blamed the surgeon, supervising nurse and the anesthesiologist. The patient, he said, received the wrong operation, but he did not protest.

"We're awfully sorry about it," he said, "but we don't know who the woman was who was operated on. We probably would not be charged with it."

SPORT

That First God's A Big One

Scoring the first goal in a hockey game is a highly important achievement. Records reveal that in the first 54 games played in the National Hockey League this season, the team that notched the first goal won 30 of the 54.

Detrol Red Wings and Boston Bruins, the two top teams in the National Hockey League, have each scored the first goal in 10 of their 20 games.

Camel Bank Robbed

DETROIT.—A bank robbery in Detroit, Michigan, on Monday night, resulted in the death of a man and the capture of two others.

Helpful Hints

For light for reading and close work, use a lamp with a reflector that gives the light a soft, even glow.

Light time of day

When you wash painted walls, use a soft brush and plenty of water. Do not use a hard brush, as this will scratch the paint.

Elephants Do Forget

Elephants do forget, says the World Book Encyclopedia. If elephants had good memories it would be impossible to train them because they are bound and starved when they are not trained.

Postmarked Mills to Safe

ST. LOUIS.—Thousands of rats moving in the wake of drought have destroyed 50,000 acres of the best grain land in Queensland, northern tropical coast, Papua, said a government official.

Driver Killed in Crash—Indiana killed in the crash of a truck-trailer-truck 14 miles west of Fort Wayne, Ind. The driver, John Barrett, 33, of London, Ont., the driver of the truck-trailer-truck, was killed.

What A Memory! Mathematical Mental Wizard

CHICAGO.—"What a memory! But he never misses a fact. That's the usual first reaction on seeing Oleg, the mathematical mental wizard, sort through his bag of tricks. But Oleg is quick to debunk his talents."

"Send me for a dozen eggs and a pound of butter," said Oleg. "I'll come back with an egg and a pound of butter."

He calls for telephone numbers, names, and addresses. He performs various feats of memory, and he is a very good mathematician.

Know The Number

"Why do you say so hard at it, Oleg," he asked. "The number is 1,000. The number is 1,000. The number is 1,000."
